

Libby Instructions

Libby is the new app from our New Hampshire Downloadable Books' vendor, OverDrive. At this time the new app can be used in addition to the current OverDrive app. Both apps allow you to read eBooks and listen to audiobooks on your mobile phones and tablet devices.

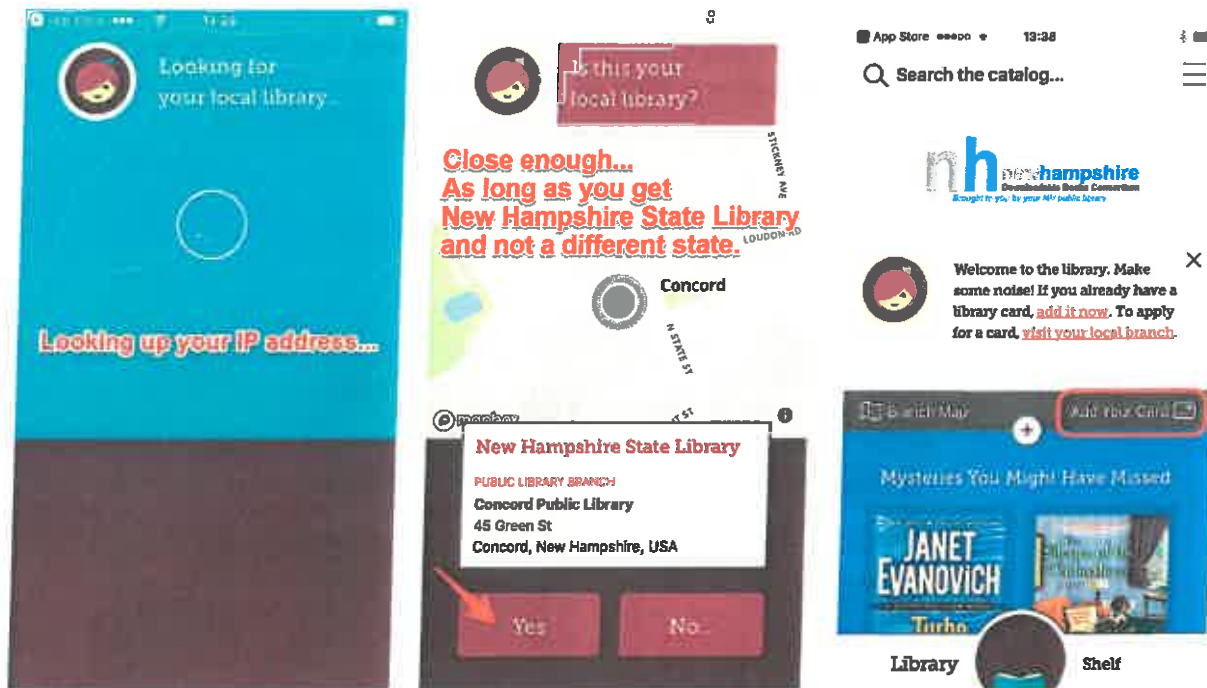

Finding the Libby App in the Mobile App Store

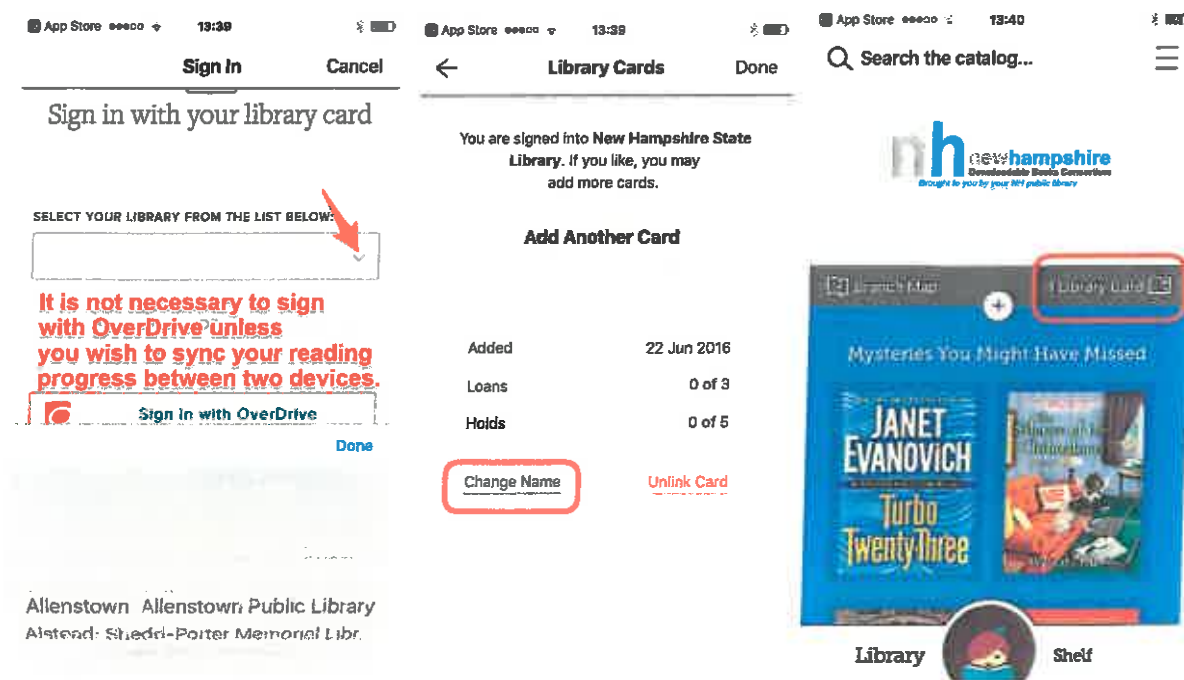

The first time you load Libby, you will walk through these welcome screens.

Find your library and add your library card. Any result for “New Hampshire State Library” is acceptable. You will need to sign into your local public library when you add your card.

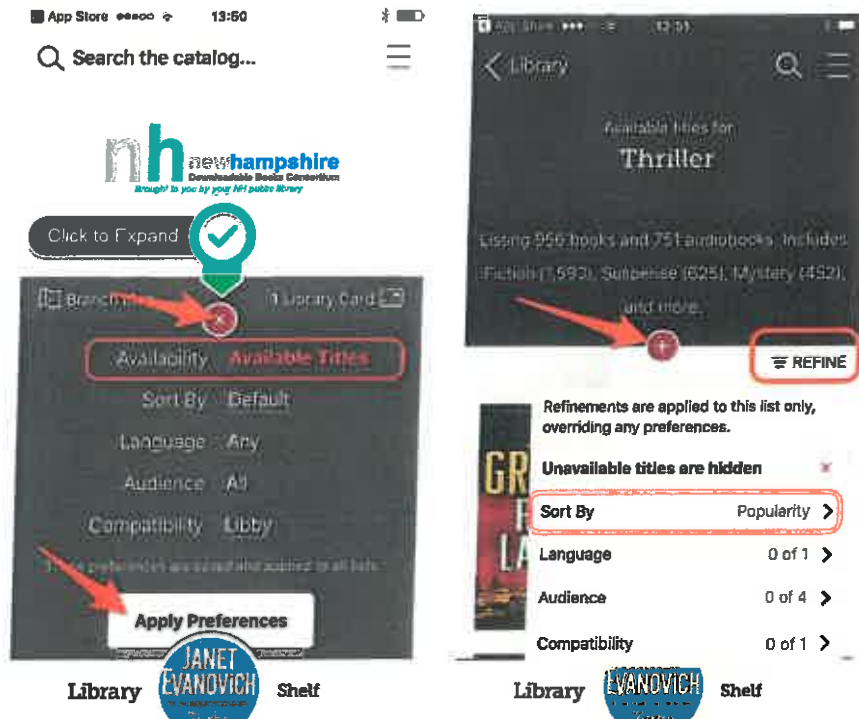

Sign in with your library card number. It is not necessary to sign into an OverDrive account unless you wish to sync your eBook or audiobook across multiple devices, allowing you to jump to the last read location.

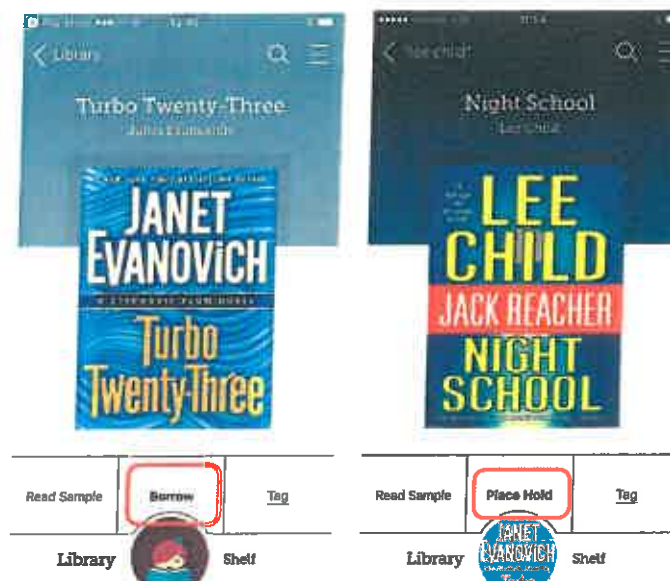

Navigating the Site

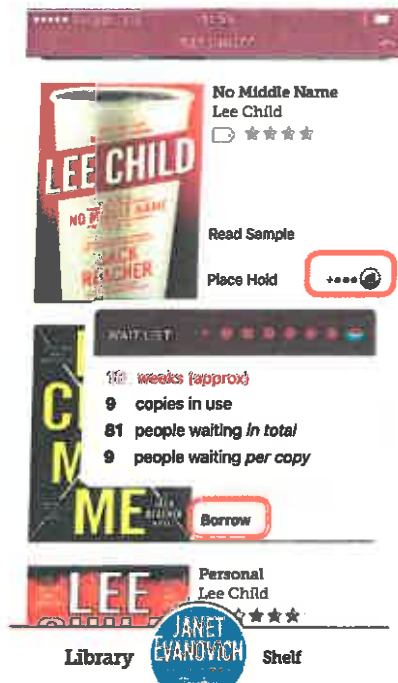

Tapping on the small “+” symbol in the center of the screen will provide you with many more browsing and sorting options!

Spotting the Difference Between Available and Checked Out Titles

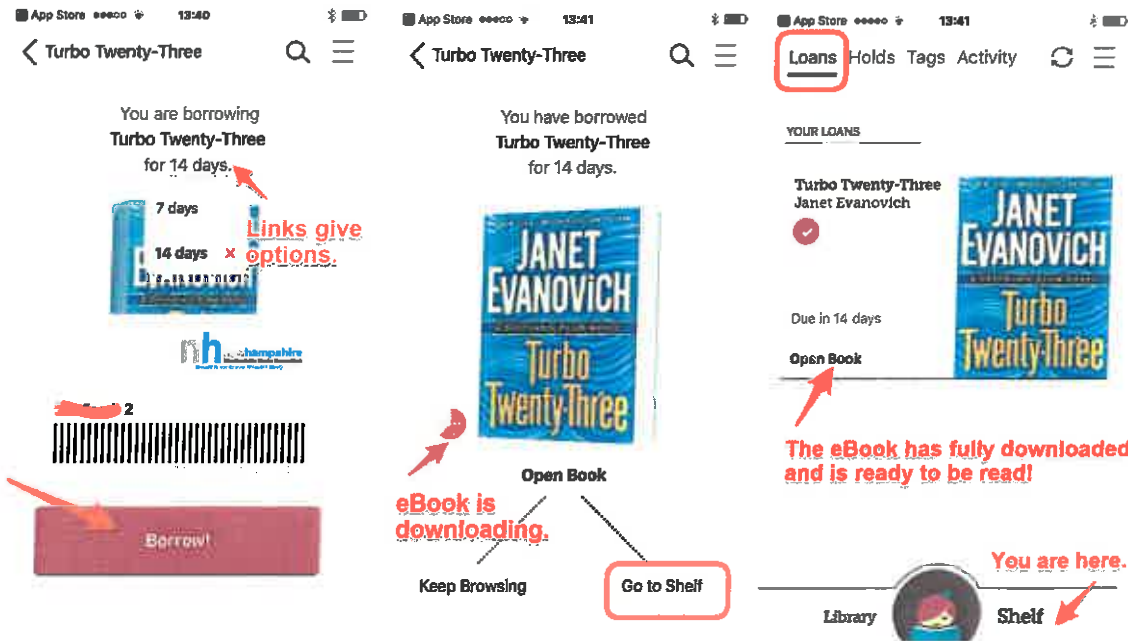

The results of a search allow you to see the borrowing or hold options in a listview. Tapping on the Wait List icon provides more details.

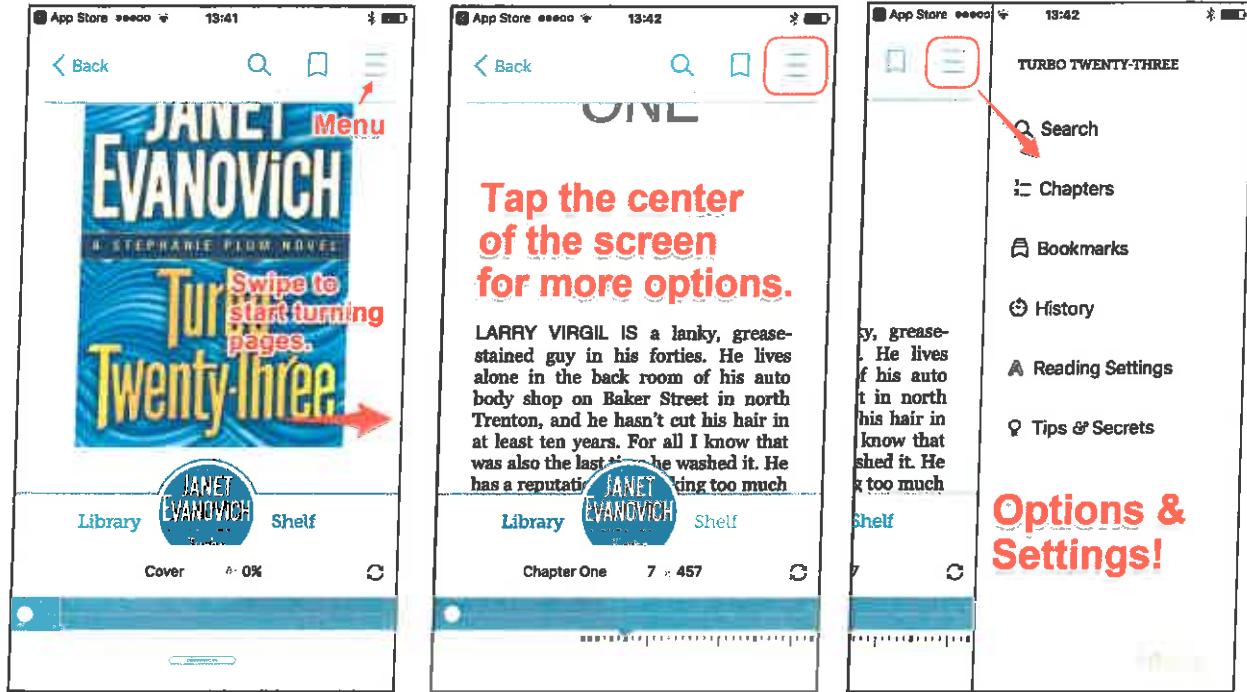

Borrowing the Title

Select your desired borrowing period and tap borrow. Though app settings, you can set your automatic download preferences.

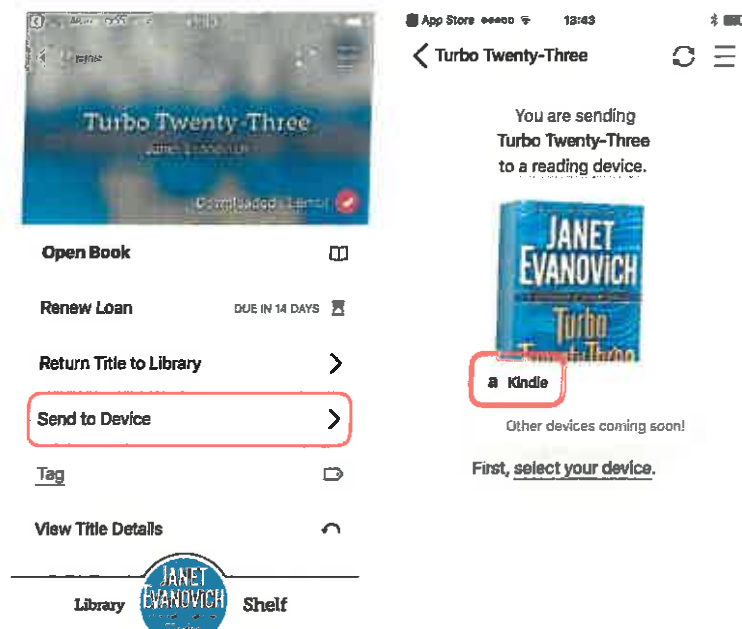

Reading the eBook

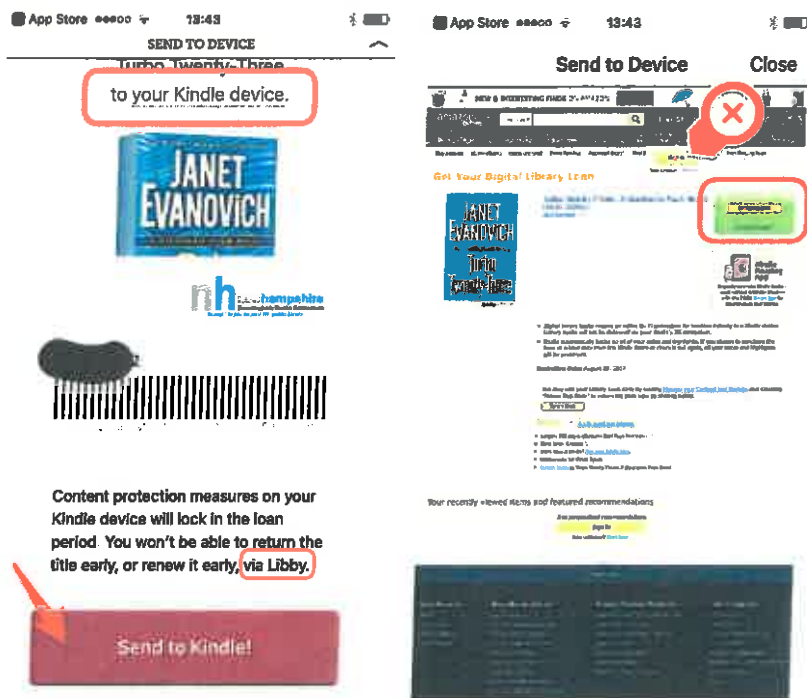

Once the book opens, swipe or tap the screen to turn pages. View the Menu to see more options.

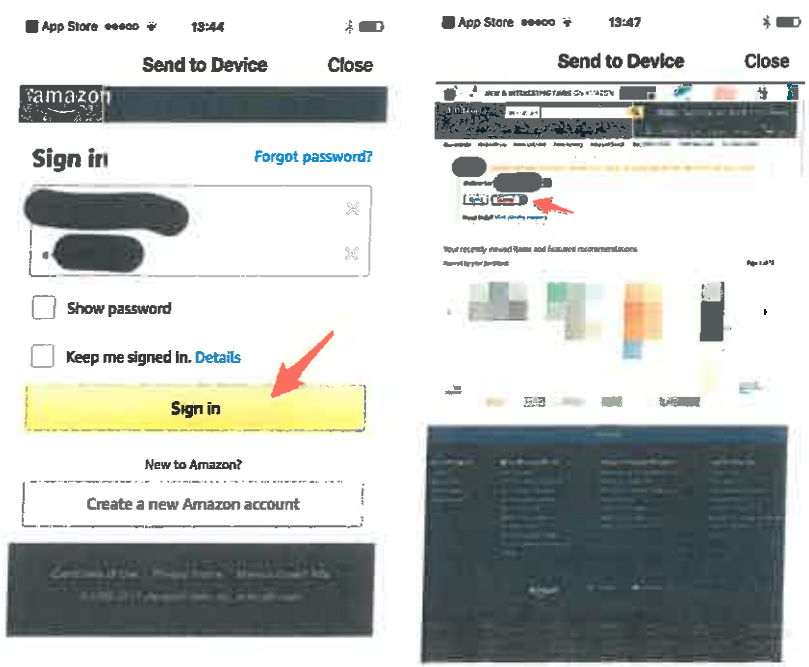

Sending the eBook to a Kindle eReader or Kindle App

Be careful to log into the Amazon correctly so as to not get off track. Ignore the “Sign in” button and tap on the “Get library book” button instead.

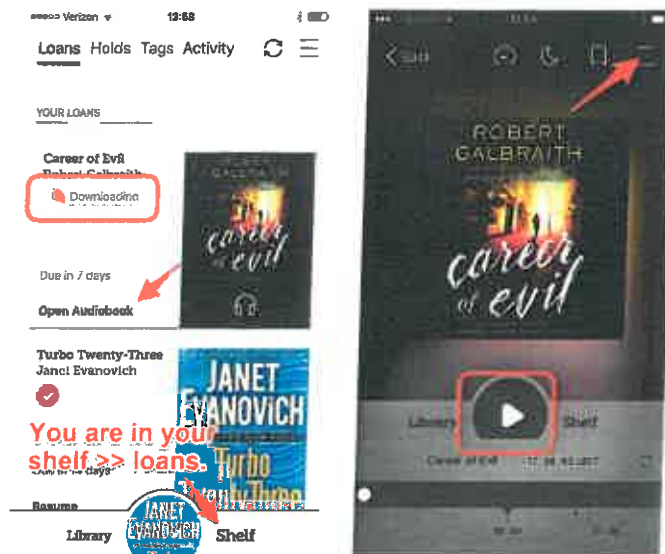

Sign into Amazon and send the eBook to the desired Kindle eReader or Kindle app.

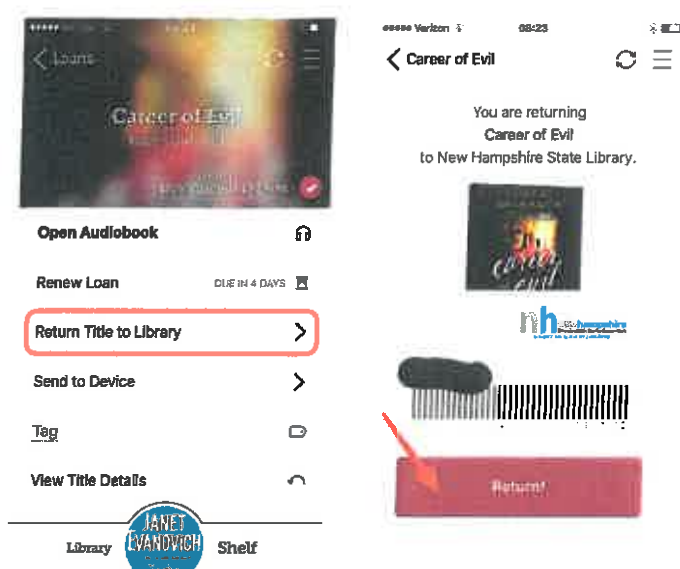

Listening to an Audiobook in the Libby App

Checking out an audiobook is the same as checking out an eBook. The only difference is the size of the file. (Remember, audiobooks are often 10-20 hours of audio!) It is possible to adjust your [download settings](#) to only download large files (like audiobooks) on Wi-Fi, if desired.

Early Returns from the Libby App

From "Shelf," tap on the cover image of the book. Note that eBooks sent to a Kindle eReader or Kindle app must be returned from the Amazon website. See these [instructions](#).

Download Settings

From the Libby app's main settings menu (three horizontal lines found on the app's homepage), you can set your download settings based on your reading habits and cellular connectivity usage preferences. The eBooks are typically very small and will not use much cellular data, but audiobooks can use much more! Select the option to only download on Wi-Fi if you are concerned about cellular data usage.
